

When you think of cabinets, you probably think of the kitchen first. But did you know that KraftMaid's quality cabinetry and innovative storage solutions can transform your bathroom too? Whether you are designing a master suite, hallway bath, or powder room, we help you create beautiful and functional spaces that reflect your personal style. With KraftMaid, create a personalized bath with more than 45 finish options, over 100 trend-on door styles and thousands of other choices. Here are some ideas to get you started.

A MAKE IT DRAMATIC

1. Baths shouldn't be boring! Create impact with interesting door style, finish and accessory choices.
2. Add a luxurious feel to larger spaces with deeper finishes such as Burnished Autumn Blush or Peppercorn. Add crown molding, fluting and decorative onlays to further enhance the rich look.
3. Keep it light and bright in small spaces with cabinetry in painted, thermofoil or natural finishes.

B MAKE IT ORGANIZED

1. Put hairstyling appliances, toiletries and more within easy reach using our Vanity Pull-Out.
2. Keep dirty clothes out of sight with our Vanity Hamper Base, which includes a slide-out basket.
3. Store extra towels or organize magazines in an interesting way using Wine Storage Cabinets.

C MAKE IT CREATIVE

1. When using a fashion-forward vessel sink in the bath, consider creative cabinetry uses:
2. Go modern! "Float" the sink base using a Wall Refrigerator cabinet as shown here.
3. Use a 29" high desk door cabinet to put 5.5" or taller vessel sinks at a comfortable height. To allow for plumbing, eliminate the drawer or use a full-height door cabinet.
